PPG/PMW/1998/584

26th October 1999

Dear Sirs,

Site of Tenaplas Drive, Upper Basildon, Berks.

Further to our letter and application dated 7th October 1999 under the Building Regulations, we enclose two copies of drawing number 1998/584/101A, being the revised drainage layout for the above.

Due to the ground conditions encountered, we have decided to remove the soakaways from the proposal and incorporate a continuous drainage soakaway trench around the perimeter of the site. This method will increase the water storage capacity and also increase the chance of penetrating the sand seams into which the water will readily drain.

We should be grateful if you would substitute the enclosed drawings for drawings numbers 1998/584/101 which were submitted with the original application.

Yours faithfully,  
Edward J. Payne & Associates
